

## Range of new cleaning equipment for UP campuses

Local cleaning company, Global Cleaning Services, recently took delivery of a range of industrial cleaning equipment supplied by Goscor Cleaning Equipment.

Global Cleaning Services has for several years enjoyed approximately 45 percent of the University of Pretoria (UP) cleaning contract which includes all academic campuses – and during November 2011 the cleaning company was awarded an additional further 35 percent. “Part of the tender was to provide a new strategy for the cleaning operations, which included a fleet of new cleaning machines, and we were very pleased to have been successful,” said Manie Nothnagel, Global Cleaning Services’ Operations Manager responsible for the UP tender process.

Nothnagel made special reference of the role that the Goscor team played in securing the successful bid at UP. “Their equipment is of exceptional quality and is matched by the service and support. We knew that their input would be vital to winning this contract and they didn’t disappoint,” he said.

The deal, worth close to R2 million included: 160 Ghibli A55 5lt Vac machines, 82 Ghibli SB143 single disc machines, several Tennant carpet cleaners and carpet driers, and several Tennant T2, T3 & T5 walk-behind auto scrubbers. [acr](#)
