

# Davey Pump

Goscor Power Products (GPP) introduces of the new single and two-stage Davey pumps powered by the highly respected EX 17 and EX 21 Subaru engines, equating to six and 7hp respectively.

These self-priming engines are capable of a pumping head of 72 to 106m and have a wide range of applications including in agriculture, fire-fighting, irrigation and high-head water transfer.

Other important features include a four-way discharge port for any installation with a choice of plumbing sizes; low-oil protection on all models – engines will not start or run if oil level is inadequate; and patented floating impeller neck rings both front and back.

As with all Goscor's Subaru engines, the Davey range is designed for maximum accessibility and easy maintenance. The impeller is effortlessly removed during maintenance with a 7/16 to 14 hex nut being used to easily lift the impeller during assembly.

*Goscor Power Products has introduced the new single and two-stage Davey pumps powered by the highly respected EX 17 and EX 21 Subaru engines.*
