

## Cost-Effective Generator

DEMAND for Goscor Power Products' 7 hp generator is soaring, and MD **Mark Bester** puts this down to its cost-effectiveness and reliability. Neatly packaged in a roll cage, the GPP3000 is powered by the new EX-21 7 hp Subaru engine and is light on fuel and oil. Subaru engines, with their unique overhead cam technology, have developed a reputation for being among the most reliable engines for this type of application. These engines, because of their construction and superior performance, are fast becoming the preferred brand of engine in a wide range of applications and have stood the test of time in the generator environment.
