

## After-Match Clean-Up

CLEANING up after the party at the 94 000-seat Soccer City stadium following the official opening ceremony and the first Bafana Bafana match – and all other matches – of the

2010 World Cup finals was a challenge for the cleaning division of Global Events Management (GEM) but, with Goscor Rental's help, the company handled the task superbly. GEM turned to Goscor Rental for the equipment and operators and procured three specialist cleaning products from sister company Goscor Cleaning Equipment, two sweeper/scrubbers which were capable of vacuuming, sweeping and scrubbing the concourses simultaneously and a Green Machine sweeper for the surrounding areas. The two machines used on the concourses were an M30 Tennant sweeper/scrubber and an M20 Tennant sweeper/scrubber.
