

All-new liquid fertiliser pumps

In preparation of the planting season, Goscor Power Products has developed a brand-new long-coupled liquid fertiliser pump, powered either by a robust Subaru EY20 engine or its premium series of Subaru EX engines in 5, 6 and 7 HP options.

"This new model range complements our already successful range of close-coupled Banjo fertiliser pumps," says managing director Mark Bester.

The main differentiating feature of the new line-up is that the pump is separated from the engine. "Although the unit is slightly more expensive, many farmers prefer a pump that is separate from the engine which ensures that corrosive liquids do not spill on the engine should the pump leak," he says.

According to him being able to offer engines from 5 to 7 HP represents a significant competitive advantage. "Fertilisers weigh more than water and can cause the engine to labour during fertiliser off-loading. Having high HP engines is a particularly useful feature since the pump flow can be increased to apply fertilisers easily".

The pump is fixed onto a duplex base in a full-wrap frame mounted on rubber mountings. A stainless steel shaft, protected by a coupling guard, couples the pump to the engine. The full-wrap frame also enables easy handling while offering additional protection to the entire pump and engine unit.

Distribution is available through their nationwide dealer network. Tel: 011 238 2600 or visit www.goscor.co.za

Liquid Fertiliser Pumps now available from Goscor Dealers

2" Polypropylene Self-Priming Centrifugal Pumps

EX21

**7HP
ENGINE
NOW AVAILABLE!**

Pump features:

- Precision molded construction
- Low maintenance & lightweight
- EPDM Standard, FKM (viton type) available

Corrosion resistant!

Supplied with a spacer kit between engine & pump consisting of a liquid slinger on shaft. Preventing any leakage onto engine!

EX17

EY20

Pumps powered with 5, 6 & 7 HP to increase flow rate of liquids heavier from 1.2 - 1.4 sg

PEDESTAL PUMP

Maximum Engine Protection!

We have designed the new Banjo poly pump to protect the engine seal in the event of pump seal failure. This new slinger design is the best in the poly pump industry at protecting your engine.

**3 YEAR
WARRANTY**
