Reducing downtime

RENTING HIS FORKLIFT FLEET FROM GOSCOR Rental Company (GRC) has eliminated downtime in his operation says Afrox Industrial and Medical Gases production manager Gert van den Heever.

"This arrangement has revolutionised our forklift efficiency," he says. "I have a GRC technician on site every morning checking

and, if necessary, attending to more serious problems and if the problem is too serious we'll have a replacement truck delivered within the hour," says van den Heever.

He adds that GRC's service has been outstanding. "We looked at many leading forklift brands for the fleet and Goscor won the deal because of their reputation for excellent support and service. We had high expectations of them in this department and

they have not only met them, but surpassed them," he says.

Van den Heever has nine Doosan diesel forklifts in his fleet, which he recently got his team to 'spruce up' for the visit of the international Board of Directors. "It was most impressive," he says, "but, most importantly, very motivating for the team who take pride in their work and they received the praise they deserve."
