

# Goscor supplies

## Israeli giant Diplomat

DIPLOMAT, ISRAEL'S LEADING sales and distribution company with many iconic suppliers has chosen Goscor Lift Truck Company (GLTC) as its materials handling supplier for its new South African operation. Its first order, valued at some R2-million includes three 2,5 t Doosan diesel forklifts, two Crown ESR 5000 reach trucks and two Crown WT 3000 powered pallet trucks. Diplomat South Africa operations director Mark Damen says he had little difficulty in choosing GLTC to provide the warehouse equipment. "I have known the company for a long time and have faith in both its product and support service. I believe Crown to be the best reach trucks on the market, and this tipped the scales in favour of Goscor, who offered a competitive package overall and everything's working out fine," he says.
