

# Carpet Cleaning

GOSCOR Cleaning Equipment has launched Tennant's ReadySpace technology in South Africa.

This technology means that the space one occupies is ready 30 minutes after carpet cleaning has been completed.

Not only is drying time ultra rapid, but ReadySpace also helps reduce mould and bacteria growth and leaves cleaner, healthier spaces by using 80% less water and leaves up to 90% less water in the carpet. The patented ReadySpace technology features unique soil transfer rollers.

When damp, these fabric rollers grab dirt from the carpet fibres and lift it into the machine.

Inside the machine, a sprayer rinses the soil from the rollers, after which two powerful individual vacuum shoes extract the dirty water and deposit it into the recovery tank.
