

HIGH POWERED BACK-UP

Eskom has announced that power supply will be tight over the next two years, until the first units for Medupi Power Station are commissioned. Small businesses seeking generators which are light on fuel and oil should consider the compact, 7 hp GPP3000 generator, says Mark Bester MD of Goscor Power Product. The generator features more torque and horse power, and is suitable for power tools and lighting. Bester claims that the cost effectiveness and reliability of the generator has made it popular even at times when the main electricity supply is more reliable. "It is an extremely versatile machine and can be used almost anywhere." Neatly packaged in a roll cage, it is

powered by the new EX-21 Subaru engine. The unique overhead cam (OHC) technology features fewer parts,

hence less maintenance. Bester adds that the OHC engine is quieter which reduces vibration.
